

European Operational Program for Exchange of Weather Radar Information (OPERA)

OPERA production data and software release 2026a

Prepared by:	M. Radojevic, V.Meyer, V.Klaus, G.Haase, H.Leijnse, A. von Lerber, K.Stephan, M.Veldhuizen, S.Klink
Project:	OPERA Production release 2026
Production Centre:	DWD, GeoSphere Austria, KNMI and Météo-France
Application Domain:	CUMULUS, STRATUS, CIRRUS and NIMBUS production
Processing Software:	CIRRUS 1.6.0 (including BALTRAD version dated 2025-10-01), NIMBUS (including BALTRAD version 3.1.0, dated 2026-06-09)

Reference	Date	Author(s)	Content
OPERA_release_notes_20260527	11.05.2026	Annakaisa von Lerber	First draft
OPERA_release_notes_20260602	02.06.2026	Milka Radojevic	Release notes CIRRUS 1.6.0
OPERA_release_notes_202606012	12.06.2026	Vera Meyer	Release notes: NIMBUS (operational aspects)
OPERA_release_notes_20260527	16.06.2026	Annakaisa von Lerber	Adding corrections and comments

1. OPERA production data release 2026a

1. Data exchange update

- Estonia: data transfer from upgraded (SSPA, updated radar coordinates) radar (EEMH40) and old radar (EEMH41) and including extended number of radar variables (including dual-pol variables)
- Spain: data integration of LEMM 62 (new site) and 47, 52, 53, 60 (replaced radars)
- Poland: increased radial resolution 1 km to 0.5 km for 10 radars (SOWR)
- France: integration of new data from LFPW51 (replaced radar)
- Netherlands: improved DBZH data quality, file format updated to ODIM2.2, increased data precision, and including extended number of radar variables (including dual-pol variables) (EHDB)

2. Metadata and ODIM update for all production lines

- Sweden: Update to ODIM_H5 v2.4.2 for 12 radars in Sweden (ESWI)
- Finland, Poland, and Estonia; updated of WSI (WIGOS Station Identifier) in metadata.

2. OPERA production software release 2026a

1. CUMULUS and STRATUS

- No changes

2. CIRRUS (version 1.6.0)

- **Correction of metadata in HDF5-ODIM**
 - Attribute name *license*
 - String termination of the /how attributes set to NULLTERM
- **Corrections of metadata in incoming data**
 - NOD identifier for ESWI45 (Sweden), SOWR50 (Poland), LEMM52 (Spain)
 - Radar coordinates: LEMM47 (Spain) and EEMH40 (Estonia)

3. NIMBUS

- **NIMBUS production update**
 - Implementation of centralised wind profile production in NIMBUS
- **Bugfixes**
 - Cleaned up NIMBUS software base
 - Fixed composite corner coordinates representation in metadata
- **Post-processing and operational services**
 - Operational dissemination and monitoring of wind profile data to E-Profile
 - Further improvements in product monitoring

- Improvements in composite dissemination to prevent dissemination of corrupted files
- **Notes**
 - For the QC-volumes provided to NWP consortia: the quality field for "hac" is missing in datasetX/qualityY although it is noted in /how/task (this will be investigated)

4. Open Radar Data API

- Not yet involved in the OPERA production release. Included in the 2026b.
